EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Claims

In claim 6: line 4, before "small", -- is -- has been inserted, since this was clearly intended.

In claim 10: line 2, "the" has been replaced with -- a --, otherwise "the wavelength discriminating component" has no antecedent basis.

In claim 14: line 6, "source" has been replaced with -- output signal --, otherwise "said source" has no antecedent basis.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Best reference noted is Ackerman et al' 999. This patent claims an invention similar to the present invention having the same inventors. However, the crystal material used that is disposed in the optical path is different than the one now claimed. Therefore, in light of this difference, an obviousness type double patenting cannot be established.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
